SUMMARY

Junior Software Developer with hands-on experience across startups and enterprise, building systems that streamline workflows and improve user-facing functionality. Skilled in Java, Python, React, Spring Boot, and SQL, with experience working independently and in agile teams to deliver reliable solutions. Committed to continuous learning and contributing to team success.

SKILLS

Programming Languages:	Java, Python, C#, Swift, Kotlin
Frameworks & Libraries:	Spring Boot, REST API, JUnit, React, Angular, PyTorch, OpenCV, YOLO, WebRTC
Database Management:	SQL (MySQL, PL/SQL), MongoDB, Apache Kafka
Software & Tools:	Git, Jira, Docker, Figma, GitHub Actions
Cloud Computing:	Amazon Web Services (AWS) EC2, DynamoDB, VPC, SQS

EXPERIENCE

Cloud2 Software – Toronto, ON

Full Stack Developer (Co-Op) | May 2025 - Aug 2025

- **Tech Stack:** Java, React, Tailwind CSS, SonarQube, Jest
- Increased backend unit test coverage from 0% to **~80%** for critical internal services by writing Java tests and integrating with SonarQube, improving system reliability for the engineering team
- Built a file import feature with **React** and **Tailwind CSS**, enabling seamless server uploads and reducing manual upload errors by **~25%**
- Migrated frontend state management from React State to **Apollo GraphQL**, improving scalability and maintainability of internal applications
- Developed **Jest frontend tests** to validate the file import feature, reducing QA bug reports by **~30%**
- Delivered a localized and accessible UI aligned with Figma designs, improving consistency across regions

Evertz Microsystems – Burlington, ON

Software Design Engineer (Co-Op) - Design Verification Group | Sep 2024 - Dec 2024

- **Tech Stack:** Python, Git, Bitbucket, Flask
- Developed a **Python**-based server health monitoring script for 32 live stream server cards, reducing manual verification time by **~95%** and ensuring reliable uptime monitoring
- Automated export of development logs from internal portals to HR-compliant Excel templates, minimizing manual data entry
- Conducted hardware diagnostics, BIOS/driver updates, and card repairs SSH and serial connections, reducing server downtime and improving operational efficiency

PROJECTS

Brawlr – AI Boxing Judge

Capstone Project - Sheridan College | Jan 2025 - Nov 2025

- **Tech Stack:** Python, OpenCV, PyTorch, WebRTC, React, Roboflow, Label Studio, Git
- Developed an **AI-powered** system that counts punches in **real-time** or from uploaded videos, tracking straight punches, hooks, and uppercuts
- Implemented **pose estimation** and **motion tracking** using **Python**, **OpenCV**, and **PyTorch**
- Collected and annotated training data in **Label Studio** using self-recorded boxing footage, improving model accuracy
- Built a **React frontend** to display total punches and breakdowns with a clean, user-friendly interface
- Integrated **Roboflow** for streamlined model training and annotation workflow

EDUCATION

Sheridan College

Advanced Diploma, CST-Software Development & Network Engineering (SDNE) - GPA: 3.60 / 4.0 | Jan 2023 - Dec 2025

Brock University

Bachelor of Arts, Political Science | Sep 2012 - Apr 2017
